

# TOSHIBA

The power to open people's eyes

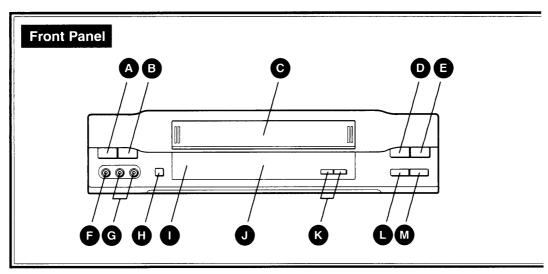

V726B/V727B

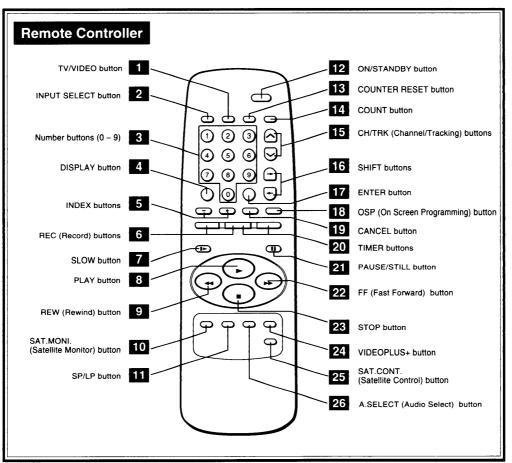

Owners Manual

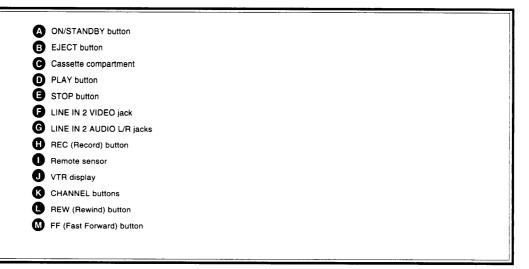

# SECTION 1 GENERAL DESCRIPTIONS

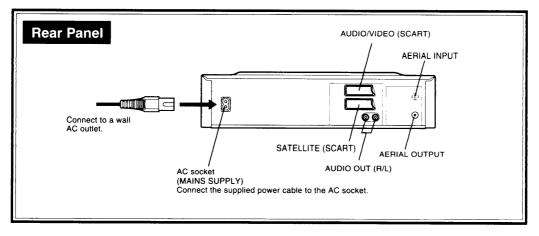

## **OPERATING INSTRUCTIONS**

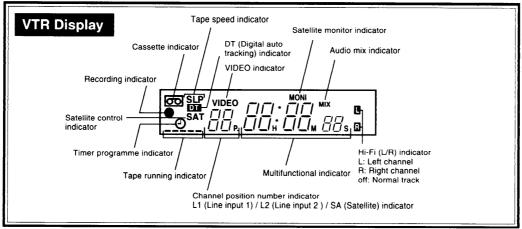

## 1. IDENTIFICATION OF CONTROLS

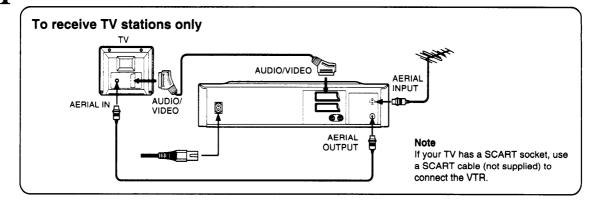

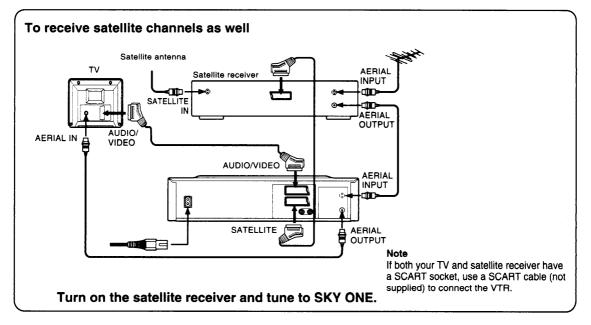

## 2. AUTO SET UP

The Auto Set Up function automatically tunes in TV stations and sets the clock. All you have to do is to connect the VTR to your TV, and then plug the power cable into the mains outlet.

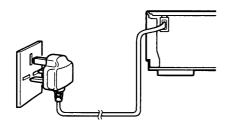

## **Auto Set Up**

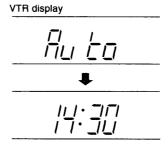

1 Connect the VTR to your TV with an aerial cable from the main antenna.

Plug in the VTR to start its Auto Set Up.
The display will flash "AUTO" for a few minutes.

When complete, the display will show the time e.g. "14:30".

The Auto Set Up has now tuned in all the TV stations on this VTR and set the time. You now need to set the video channel on your TV if you make a connection without the SCART cable. (See next page.)

#### Note

The Auto Set Up procedure above is available only on the first time you connect this VTR.

## 3. WATCHING THE VIDEO PICTURE

The way you operate the unit to watch a video picture depends on whether you use a SCART cable or not.

## For SCART Cable Users

■ To watch a video picture from the VTR

Insert a cassette and press the PLAY button on the remote controller or front panel of the VTR.

8

■ To watch or record a programme from the connected satellite receiver

Press the INPUT SELECT button so that "SA" indicator appear in the VTR display.

2

16

## For Non-SCART Cable Users (Setting the Video Channel)

The VTR signals are sent to your TV from the AERIAL OUTPUT socket. Your TV must have a channel set aside exclusively for these VTR signals. This is called the video channel.

Turn on the TV.

ON/STANDB

OSP

Select a free channel on the TV which you wish to use for your video picture, for example channel 9.

This channel 9 will be only used for watching a video picture.

Press the ON/STANDBY button to turn on the

18

VTR.

Hold down the OSP button for more than 5 seconds.

VTR display

**VIDEO** 

Tune the TV (on channel 9 for example in step 2) so that the following screen is shown clearly. (For tuning the TV, refer to the TV's manual.)

If after tuning (in step 5), you still have some interference because of neighbouring broadcast channels, press the SHIFT button to select another video channel between channels 50 and 67.

(4)

**VIDEO** 

Re-tune the TV to around UHF channel 62 (for example), and confirm the screen is shown clearly.

Press the OSP button. Video channel setting is complete. 18

3

On the screen in step 5 in "Setting the Video Channel", the antenna output can be set to "MIX" or "SW". (Applied when the VTR is connected to your TV only via the AERIAL OUTPUT socket.)

Press number button 4 to select "MIX" or "SW".

MIX: You can watch a video picture on the video channel regardless of whether or not you have pressed the TV/VIDEO button.

The switch should only be set to "SW" if the video pictures or TV pictures cannot be obtained clearly.

SW: You can watch a video picture on the video channel only when the "VIDEO" indicator is lit in the VTR display by pressing the TV/VIDEO button.

## 4. CHECKING AUTO SET UP/CHANNEL SWAPPING

This section explains how to check if the TV stations are stored on the VTR correctly. If they are not stored correctly, you must enter them manually.

## **Checking Auto Set Up**

Using the CH/TRK buttons on the VTR's remote controller, check that the order of the TV stations stored on the VTR is as below. (This is important for the correct functioning of Video Plus+.)

| Position number | TV Station            |   |
|-----------------|-----------------------|---|
| 1               | BBC1                  | Position number 5 is reserved for Channel 5 and |
| 2               | BBC2                  | Position number 6 for a satellite receiver      |
| 3               | ITV                   | connected with an aerial cable. These positions |
| 4               | Channel 4             | will be empty if there is no satellite receiver |
| 5               | Channel 5 (From 1997) | connected, or if you cannot receive Channel 5   |
| 6               | Satellite Receiver    | broadcast.                                      |

Any other stations are stored from position number 7 onward. If one of these has a better picture or is your preferred regional station, (e.g. Carlton instead of Meridian) then you can swap this into another position number. See the procedure below.

15

18

## **Channel Swapping**

This VTR can move a TV station stored by Auto Set Up to another position number. This is called "Channel Swapping".

To move a TV station stored on position number 7 to position number 3.

Select position number 7 with the CH/TRK

VTR display

Press the OSP button. The MENU screen appears.

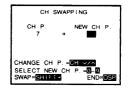

Press number button 5 to select "TUNING AND SATELLITE".

CH SWAPPING
MANUAL TUNING
VIDEO PLUS+ GUIDE CH
ANTENNA SELECT (MIX)
SATELLITE SETTING
SATELLITE INPUT ( SAT )
SAT. BRAND NO. (17) SET=0-8 END=OSP Press number button 1.

The following text will be superimposed over the position number you selected.

3

3

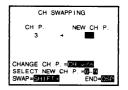

16

15

18

Press number button 0 and 3 to select a new position number, then press the SHIFT( $\rightarrow$ ) button.

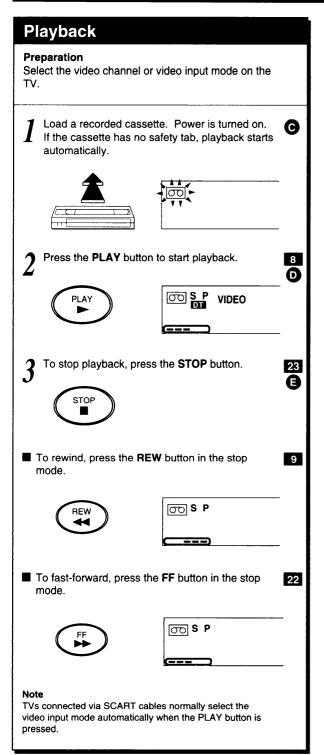

To select another stored station to move, press the CH/TRK buttons and follow step 5.

Press the OSP button. Now Channel Swapping is completed. Further press the OSP button twice to return to the normal TV screen.

## 5. PLAYBACK

This section explains the basic playback operation.

## Playback and recording with the LP tape speed

When playing back a tape that has been recorded on another VTR, it may happen that the picture colour disappears, the picture becomes unstable and that noise occurs. It is therefore recommended that tapes that have been recorded on this VTR also are played back on this VTR.

## ■ Digital Auto Tracking

When playback starts, the VTR automatically adjusts the tracking for clear pictures and sound. The "DT" indicator blinks during the adjusting.

#### Notes

- During the adjusting, the playback picture and sound may be distorted.
- The digital auto tracking is activated only in the playback mode.

#### Adjusting the tracking manually

If the VTR cannot locate the best possible tracking point, hold down one of the **CH/TRK** buttons until you obtain the best possible picture and sound.

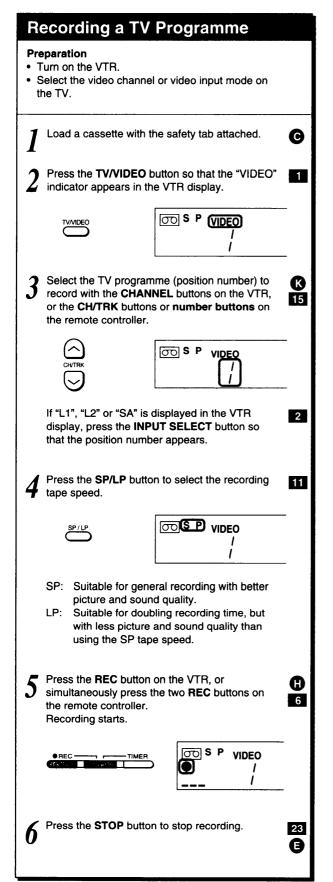

#### Notes

- To reset the tracking point to the center, press both the CH/TRK buttons simultaneously.
- To resume the digital auto tracking, hold down both the CHANNEL buttons on the VTR simultaneously for about 2 seconds.
- The noise on the screen may not be completely eliminated depending on the tape used, especially when the tape was recorded on another VTR.

## 6. RECORDING

This section explains the basic recording operation.

- While recording, press the TV/VIDEO button so that the "VIDEO" indicator if displayed disappears in the VTR display.
- Choose another channel using the channel selector on the TV.

#### Note

To monitor the programme which is being recorded, press the TV/VIDEO button so that the "VIDEO" indicator will appear in the VTR display. Select the video channel or video input mode on the TV.

1

Press the **PAUSE/STILL** button to stop recording momentarily. To resume recording, press the **PAUSE/STILL** button again.

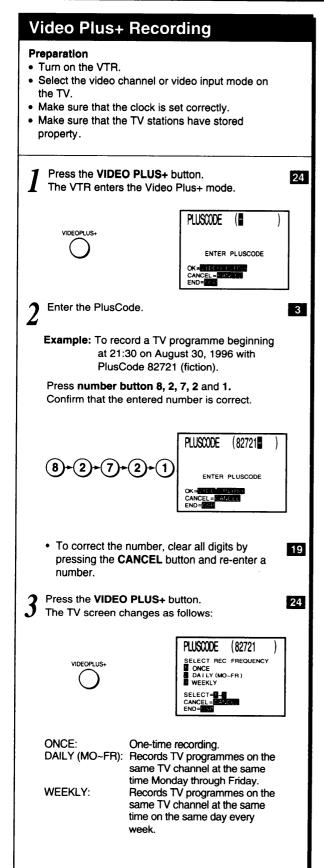

## 21

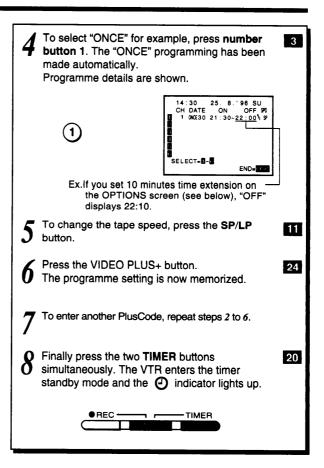

#### Note

The VTR automatically shifts to the stop mode if the recording pause mode continues for 10 minutes.

## 7. VIDEO PLUS+ RECORDING

You can easily programme a recording simply by entering the PlusCode. The numbers are published in the TV listings of newspapers, TV quide magazine, etc.

Before making a Video Plus+ recording, set possible time extension for the recording to allow for programme's overrun. You can extend the recording time in 10 minute increments up to 60 minutes.

- 1) Press the OSP button to display the MENU screen.
- 2) Press number button 3 to select "OPTIONS".
- Press number button 3 repeatedly to set desired time extension.

18

3

18

4) Press the OSP button twice to exit.

#### Notes

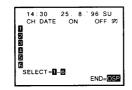

- Extend time should be set before starting Video Plus+ recording procedure.
   The time extending doesn't work on recording programmes already memorized.
- When you do not use time extension for Video Plustrecording, set to "OFF" on the OPTIONS screen.

## Comme Comme

- Before the VTR enters the timer standby mode
   ( ) indicator not lit)
  - Press the **OSP** button to display the MENU screen.
    - 18

3

2) Press number button 4 to select "PROGRAM".

Check the programmed data.

- 3) Press the OSP button twice to exit.
- 18
- During the timer programme recording.

  (② indicator lit)

Press the **OSP** button. The screen for confirming appears.

(4)

After about 30 seconds, the screen disappears.

## Cancelling the Video Plus-Timer Programme

- If the ② indicator is lit, press the two TIMER buttons to turn it off, and turn on the VTR by pressing the ON/STANDBY.
- 20
- Press the OSP button to display the MENU screen.
- 18
- 3) Press number button 4 to select "PROGRAM".
- 3
- Select a program number which you want to cancel by using number buttons.
- 3

- Press the CANCEL button.
   The line is cleared out.
- 19

6) Press the OSP button.

18

## Recording or Play

First press the two **TIMER** buttons to release the timer standby mode, and then press the **ON/STANDBY** button to turn on the VTR. The VTR will be available for use

20 12

 Be sure to press the two TIMER buttons again to return the VTR to the timer standby mode after you operate. 20

# If a power failure occurs during the timer programme recording

- If the indicator is missing in the VTR display after the power failure, the programmed contents have been cleared. Reset the timer programming.
- When power has failed for a short time, the colon of the current time display blinks. The programmed contents are not affected. Reset the clock.

#### Error Indicators

When the "FULL (CLEAR PROG?)" message appears on the TV during programming, no more programmes can be entered. If you want to add another programme, select one existing programme on the screen by using number buttons, and press the CANCEL button to delete it.

If impossible PlusCode is entered, "INVALID CODE ENTERED" blinks on the screen to tell you that the recording cannot be performed. Press the CANCEL button to clear the PlusCode and enter correct one.

If "CLASH" message appears on the screen during programming, it tells you that two programmes with the same recording start time have been entered. You have to make a correction. On this screen, blinking item number means that the item has been entered later.

- 1) Enter the number of the programme you want to correct using **number buttons**.
- Correct the timer programme data, or clear the data by pressing the CANCEL button and then press the VIDEO PLUS+ button to enter the PlusCode.

## Overlaps the programmes

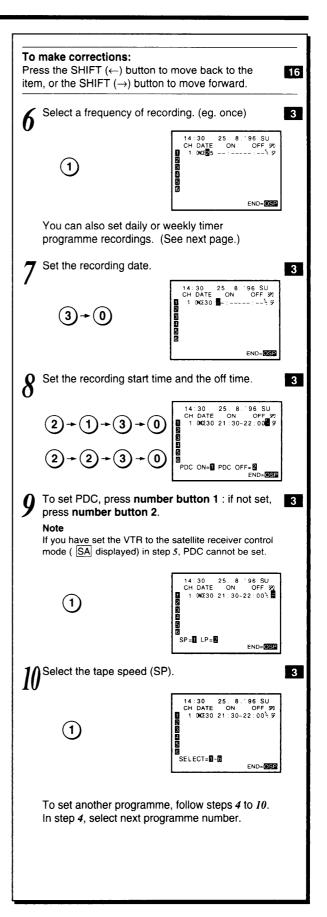

If two programmes overlap, the recording start time of programme 2 has a priority over the recording end time of programme 1.

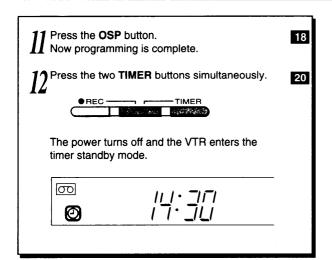

| Programme 1<br>(Start time) | (not recorded)              |  |  |  |  |
|-----------------------------|-----------------------------|--|--|--|--|
| (Start time)                | Programme 2<br>(Start time) |  |  |  |  |

## 8. TIMER PROGRAMME RECORDING

The programmable timer allows you to record up to 6 different programmes over one month.

## **Timer Programming Procedure** · Select the video channel or video input mode on the TV. · Turn on the VTR. · Make sure that the clock is set correctly. To record a programme of a station stored on position number 1 (e.g. BBC1) in the SP tape speed from 21:30 until 22:00 on August 30. Today is August 25. Load a cassette with the safety tab attached. 0 Press the OSP button to display the MENU 18 Press number button 4 to select "PROGRAM". 25. 8. 96 SU CH DATE ON 4 SELECT=1-6 END=OSP Programme number 1 is ready to accept your input. Select an empty programme number using 3 number buttons 1 to 6. (1)END=OSP To select position number 1, press number 3 button 0 and 1. ONCE-I DAILY- WEEKLY-BEND-OSP · If you record from the connected external 2 equipment, make "L1", "L2" or "SA" appear by pressing the INPUT SELECT button as follows: L1: Via the AUDIO/VIDEO (SCART) socket on the L2: Via the LINE IN 2 jacks on the front panel. SA: From the satellite receiver connected to the SATELLITE (SCART) socket on the rear panel.

First press the two TIMER buttons to release the timer standby mode, and then press the ON/STANDBY

12 button to turn on the VTR. The VTR will be available Be sure to press the two TIMER buttons again to

20 return the VTR to the timer standby mode after you

Estational Confession (Confession Confession Confession

- The "E" (Error) indicator appears in the VTR display if you press the TIMER buttons when:
  - a cassette is not loaded.

have finished.

- -the loaded cassette has no safety tab.
- -no timer programme is set.
- In these cases, a recording can not be made.

- If the (2) indicator is missing in the VTR display after the power failure, the programmed contents have been cleared. Reset the timer programming.
- When power has failed for a short time, the colon of the current time display blinks. The programmed contents are not affected. Reset the clock.

If two timer programmes overlap, the recording start time of programme 2 has priority over the recording off time of programme 1.

|              |                             | Overlapped portion |
|--------------|-----------------------------|--------------------|
| Programme 1  |                             | (not recorded)     |
| (Start time) | Programme 2<br>(Start time) | (not recorded)     |
|              | (Start time)                |                    |

#### ■ Daily recording

You can record TV programmes on the same channel at the same time Monday through Friday. Press number button 2 for "DAILY" in step 6.

Weekly recording

You can record TV programmes on the same channel on the same day and time every week. Press number button 3 for "WEEKLY", then number **button 1** to **7** to select a day of the week in step 6.

Press the OSP button. The screen for confirming will appear.

> 14:30 25.8.96 SU CH DATE ON OFF \$70 1 000:30 21:30~22:00 \$ END=OSP

After about 30 seconds, the screen disappears.

- 1) If the (2) indicator is lit, press the two TIMER buttons to turn it off, and then turn the VTR on by pressing the ON/STANDBY button.
- 2) With steps 2 to 11, change the items.
  - To cancel a programme, select the programme number you want to cancel in step 4, and press the CANCEL button. The line is then cleared.
- 3) Press the two TIMER buttons to return to the timer standby mode.

20

3

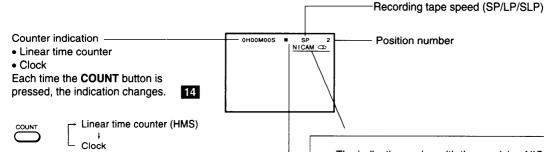

## 9. ON SCREEN DISPLAY

The VTR tells you current operating modes on the TV screen.

# Displays and Indicators on the Screen Pressing the DISPLAY button makes the operating mode appear

Pressing the **DISPLAY** button makes the operating mode appear. If you press this button again, the indication goes off, leaving the counter indication on the screen. To turn it off, press the **DISPLAY** button once more.

30

The indication above will also appear in the VTR display.

To reset the linear time counter to "0H00M00S" The counter is automatically reset to "0H00M00S" when a cassette is ejected. If you want to reset at another point, such as the beginning of a new recording, just press the COUNTER RESET button.

#### Notes

- The linear time counter does not work on non-recorded portions on the tape.
- When the tape is ejected or the VTR is turned off, the display changes to clock.
- If the tape rewinds back over "0H00M00S", "—" appears in the VTR display.
- The displayed time of the linear time counter is only an approximation.

The indicator varies with the operating mode.

| Ejecting a tape                        | <b>_</b>        |

#### Note

In addition to the indication above, the VTR may display other indicators such as index search. See respective pages for each explanation.

## 10. NTSC-RECORDED TAPE PLAYBACK

This VTR can play back an NTSC-recorded tape. You can watch the playback picture on a PAL system TV or an NTSC 4.43 system TV.

## Name of Control of the TV Co-1779C Proposition 1

Use a TV compatible with PAL video signals of PAL 60 (525 lines).

When the TV, that is not compatible with PAL video signals of PAL 60, is used (when the TV, that is compatible only with PAL video signals of PAL 50 (625 lines), is used) NTSC playback pictures may roll up and down. This is not malfunction of the VTR or the TV. If your TV is equipped with a V-HOLD control, it may be possible to stop the rolling of pictures by adjusting this control. About PAL 50 and PAL 60 of PAL video signals:

PAL 50: is a normal signal and its PAL video signal is 50 fields (625 lines).

PAL 60: is a special signal and its PAL video signal is 60 fields (525 lines).

Some TVs operate properly only with PAL 50 signals, some TVs operate properly with both PAL 50 and 60 signals.

Therefore, if your TV is switchable between PAL 50 (625 lines)/PAL 60 (525 lines), you can view an NTSC recorded tape in the PAL colour system with your own TV.

- Depending on the TV used, the picture may shrink vertically and black bars may appear both at the top and bottom of the TV screen.
   This is not an indication of malfunction.
- Variable speed playback (picture search, still, slow playback, etc.) may produce a skewed image and quite a bit of noise on the picture.
- If the tape pre-recorded in the SP tape speed mode is played back in the picture search mode, the picture may be reproduced with no colour.

#### Note

For viewing an NTSC-recorded tape, we recommend using an NTSC 4.43 TV.

## 11. VARIABLE SPEED PLAYBACK

You can playback a tape at various tape speeds.

You can locate a particular scene while viewing a playback picture in the fast-forwarding or rewinding mode.

During playback, press the **REW** or **FF** button. The tape runs at 5 times the normal playback speed.

6 22

to reverse picture search (5 times)

to forward picture search (5 times)

If you continue to press and hold the **REW** or **FF** button, the search speed increases.

22

Hold down

Reverse picture search (5 times)

To reverse picture search (13 times)

Forward picture search (5 times)

To forward picture search (13 times)

Hold down

When you release the button, the speed returns to 5 times.

To resume normal playback, press the PLAY button.

#### Notes

- . The picture will have some interference. This is not a defect in the unit.
- . If you play back a tape recorded in the LP tape speed or recorded on another VTR in various speed mode, the picture may be noisy or monochrome.
- If you press the REW or FF button while rewinding or fast-forwarding the tape, the VTR enters the picture search mode.

If you press the REW or FF button while picture searching, the VTR enters the rewinding or fastforwarding mode, respectively.

## **Still Picture**

You can freeze a picture to watch closer.

During playback, press the PAUSE/STILL button.

21

The picture freezes.

Playback PAUSE/STILL

to still picture

To resume playback, press the PAUSE/STILL button again.

21

Still picture

to normal playback

The still mode is automatically cancelled after about 5 minutes and returns to normal playback.

#### **Notes**

- · The still picture may shake if a picture of a fast-moving object or scene is frozen. This is not a defect in the unit.
- · If you play back a tape recorded in the LP tape speed or recorded on another VTR in various speed mode, the picture may be noisy or monochrome.
- If noises appear in the still picture, adjust the tracking manually in the slow-motion mode. (See next page.)

If the still picture is distorted or flickers, hold down one of the CH/TRK buttons until the picture becomes stable.

15

The distortion of the still picture may not be eliminated completely.

## Frame Advance

You can advance the picture frame by frame.

During playback, press the PAUSE/STILL button.

21

Press the PLAY button.

Each time you press the button, the picture advances one frame.

8 0

While the button is held down, the tape runs at 1/25th the normal playback speed.

To resume normal playback, press the PAUSE/STILL button.

## **Slow-motion Picture**

You can playback at 1/6th or 1/12th the normal playback speed.

During playback, press the SLOW button. The tape will run at about 1/6th the normal playback speed.

7

7

8

CH/TRK

Note

The noise in the slow-motion picture may not be eliminated completely by the tracking adjustment.

If the slow-motion picture is noisy, hold down one of

the CH/TRK buttons until the best picture is obtained.

SLOW

2 If you press the **SLOW** button again, the speed changes to 1/12th.

Each time you press the button, the speed changes between 1/6 and 1/12.

To resume normal playback, press the **PLAY** button.

The slow-motion picture mode will be cancelled automatically after approximately 5 minutes to shift to the normal playback mode.

#### Note

The slow-motion picture may flicker up and down. This is not a defect in the unit.

#### Note

When you use an NTSC-recorded tape, picture search and accelerated picture search, the slow-motion picture speeds are as follows.

Picture search: SP: 5 times, SLP: 5 times
Accelerated picture search: SP: 9 times, SLP: 27 times
Slow-motion picture: 1/7th or 1/15th the normal playback speed.

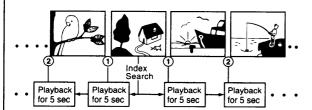

## 12. INDEX SEARCH

You can easily locate the desired programme using the index signal registered on the tape.

## **About This Function**

#### Index Search

The VTR plays back each programme with an index signal for about 5 seconds.

#### Skip Search

The VTR finds and plays back a programme with an index signal you specified.

To use this function, index signals have to be registered on your tape. For registering index signals, follow the procedure below.

■ Registering index signals automatically
An index signal is automatically registered when
a recording starts.

#### Notes

- An index signal is not registered when the VTR is in the recording pause mode and recording restarts.
- An index signal is also registered when a timer programme recording starts.

Registering index signals manually Index signals can be manually registered at desired points on the tape during recording.

Press the INDEX (+) button at a desired point.

5

#### Note

When registering two or more index signals, certain intervals are required: more than 1 minute in the SP tape speed and more than 2 minutes in the LP tape speed.

## **Index Search**

This function plays back the tape for about 5 seconds at each index signal.

Load a cassette with the index signals registered.

0

Press the INDEX (-) or (+) button in the stop or playback mode.

5

INDEX

: to search in the reverse direction

: to search in the forward direction

The VTR fast-forwards or rewinds the tape. When an index signal is found, the VTR plays back the tape for about 5 seconds, and then resumes fast-forwarding or rewinding. This is repeated each time at an index signal.

Press the PLAY button when the desired programme is found. Normal playback starts.

#### Notes

- At the very beginning of the tape, the index search function may not work properly.
- If you registered the index signals on a tape recorded on another VTR, the recording may be blurred at the index point and the index search may not work properly.

## Skip Search

This function fast-forwards or rewinds the tape to the point at which the selected index signal is registered, and starts playback from there.

Load a cassette with the index signals registered.

Press the INDEX (-) or (+) button twice in the stop or playback mode.

5

Press the **INDEX** (–) or (+) button depending on the direction where your desired programme is located.

Each time you press the (-) or (+) button, the number decreases or increases respectively.

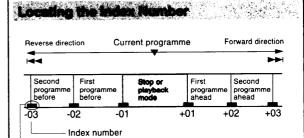

The VTR starts to search for the point you specified with the (–) or (+) button. When the point is found, playback will start automatically.

#### Notes

- You can set an index number up to ±20.
- The skip search is cancelled when the PLAY or STOP button is pressed.

#### [Example]

Index signal

- To locate the beginning of first programme before, press the INDEX (-) button three times to set the index number -02.
- To locate the beginning of next programme ahead, press the INDEX (+) button twice to set the index number +01.

## 13. NICAM COMPATIBILITY/AUDIO SELECT

VTR incorporates a special decoder that can receive NICAM broadcast programmes.

## **NICAM Broadcast Programme**

This VTR incorporates a special decoder that can receive NICAM broadcast programmes. NICAM programmes are divided into 3 types. NICAM Stereo, NICAM Mono and Bilingual (transmission in another language). NICAM programmes are always accompanied by a standard mono sound broadcast and you can select the desired sound on the screen (for recording) or with the A.SELECT button (for playback).

# Press the OSP button to display the MENU

• Press number button 3 to select "OPTIONS".

Press number button 4 to set "NICAM" to "ON".

3

3

18

26

ON: Normally set at this position.

OFF: Only set at this position to record the standard mono sound during a NICAM broadcast if the stereo sound is distorted due to inferior reception conditions.

Press the OSP button twice to exit.

When monitoring a TV programme or playing back a Hi-Fi recorded video tape, press the **A.SELECT** button to select a desired sound output. As the **A.SELECT** button is pressed, the sound output and the indicator change as below:

|      | Sound type           | Stereo sound   | Bilingual sound   | Standard<br>sound<br>broadcast |
|------|----------------------|--|---|--------------------------------|
|      |                      | Heard in stereo.<br>(left channel and<br>right channel)    | Channel I (MAIN) heard<br>from the left speaker,<br>Channel II (SUB) from<br>the right speaker. | Heard in monaural.             |
|      |                      | Left channel heard from both the left and right speakers.  | Channel I (MAIN) heard from both the left and right speakers.                                   | Heard in monaural.             |
|      |                      | Right channel heard from both the left and right speakers. | Channel II (SUB) heard from both the left and right speakers.                                   | Heard in<br>monaural           |
|      | Both L and R go off. | Heard in monaural.   | Channel I (MAIN) heard from both the left and right speakers.                                   | Heard in monaural.             |
| Mx G |                      | Sound mixed the normal audio trac                          | left and right channel, and<br>k. (See below.)  | the                            |

#### Sounds of a recorded TV programme

This VTR is capable of recording sound in Hi-Fi system. Stereo broadcasts and bilingual sound broadcasts are recorded in its original sound system regardless of the setting. (See the list above.)

#### Notes

 When listening to a stereo broadcast or playing back a Hi-Fi tape recorded in stereo, you have to connect the VTR with the stereo audio system or the stereo TV with a SCART cable.

The sound which is output from the AERIAL OUTPUT socket is monaural.

If a tape which is not Hi-Fi recorded is played back, L,
 R indicators go off automatically and the sound output is monaural.

## Audio Soloci

This unit's Hi-Fi stereo audio track (2-channel) can be used to playback an excellent Hi-Fi sound. Sound that has been recorded on the normal audio track is compatible with conventional VTR's.

When playing back a Hi-Fi recorded tape, press the **A.SELECT** button to select desired sound output. The L, R indicators in the VTR display tell you what kind of sound output you are selecting. Accordingly, you can select the desired sound output while observing the lit and/or unlit indicators. (See above "Monitoring Sound Output".)

| 0  | Salar and Line and   | TOWN COLORSON                             | MUMETUS MARRIES SAN | THE STATE OF THE S | A CONTRACTOR |

| ŧ, | The Control of the Co | Annahira in it ship a take to the fire of |                     |  | <b>"这个人"</b> |

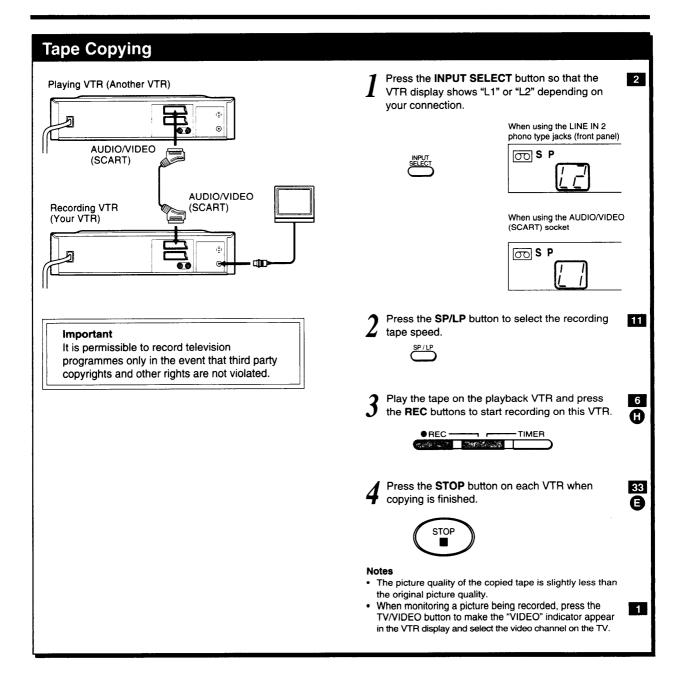

You can select different audio outputs, e.g. mixing one of the Hi-Fi stereo audio tracks and one of the normal audio track.

Press the **A.SELECT** button several times to make "MIX" appear in the VTR display.

| SELECT | MIX | 0 |
|--------|-----|---|
|        |     | B |

## 14. TAPE COPYING

You can copy a tape by using another VTR or external equipment.

## 15. CONTROL OF SATELLITE CHANNELS

Your satellite channels can be selected or changed on this VTR via the connected satellite receiver, same as TV channels.

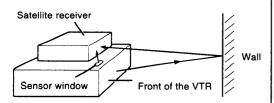

## **Setting to Control Satellite Channels**

You can select satellite channels by operating this VTR

It is also possible to automatically change the satellite channels according to your programme setting in the timer programme recording.

#### Important

Put the satellite receiver on the top of the VTR as shown below. Do not block the sensor window.

The infrared signals come out of the sensor window and the front of the VTR. Then they bounce off walls and other objects in the room and are received by the satellite receiver. The VTR sends out infrared signals to your satellite receiver even during timer programme recording.

#### Note

If the channels cannot be controlled properly because the infrared signal fails to reach the satellite receiver, change the position of the satellite receiver on the VTR so that it can receive the signal.

#### Preparation

- · Keep the connected satellite receiver turned on.
- Make sure your satellite receiver is connected to the VTR correctly.
- Select the video channel or video input mode on the TV.
- Press the **OSP** button to display the MENU
- Press number button 5 to select "TUNING AND SATELLITE".

CH SWAPPING
MANUAL TUNING
VIDEO PLUS+ GUIDE CH
ATTENNA SELECT (MIX)
SATELLITE SETTING
SATELLITE INPUT(SAT)
SAT. BRAND NO. (17)
SET-4-5 END-652

Press number button 5 to select "SATELLITE SETTING".

Set the position number or line input mode using the INPUT SELECT button depending on your satellite receiver connection. OW CONNECTED? ( A) ENTER SAT, LINE OR CH P Satellite receiver Satellite receiver Set to "SAT" Satellite receiver Enter the position number you have chosen for satellite output (e.g. 6) using number buttons. 昌 Press the **OSP** button. Enter three figures of the brand code for your satellite receiver by number buttons. Check the brand code list (next page). Ex. To enter brand code 33. SAT. BRAND NO. ( 033 (0)  $\rightarrow (3)$   $\rightarrow (3)$ SENDING A TEST SIGNAL OF CH. 12 TO YOUR SATELLITE When you enter the brand code, the VTR sends a test signal to the satellite receiver to make sure that the brand code has been entered correctly. The signal will set the satellite channel to 12. If channel 12 is displayed on your satellite receiver, it means the brand code is set correctly. Several codes may be allocated to one brand. Enter one after the other until the channel shows 12. Press the OSP button. Select 1 to 4 using number buttons as below depending on your satellite receiver. GUIDE CH SETTING HOW IS YOUR SATELLITE

|    | 103         |   | SAT     |
|    | ENTER CH P. |   | LINE    |
|    |             |   | END=OSP |

→ After having done the GUIDE channel setting, proceed to step 9.

Press the OSP button twice to exit.

18

## Controlling Satellite Channels

#### Using the remote controller of this VTR

- 1) Press the SAT.CONT. button to make "SAT" appear in the VTR display.
- 26
- 2) Select a desired satellite channel using number buttons.

17

Way of use may differ. Check how they work on your satellite receiver.

Ex. To select channel 3: • 0→3

To select channel 16: • 1→6

- 0→3→ENTER
- 1→6→ENTER
- ENTER→3
- ENTER $\rightarrow$ ENTER $\rightarrow$ 1 $\rightarrow$ 6

#### Important

Some satellite receivers may not respond to all the operations above, or may not be operated at all with this remote controller. In this case, operate your satellite receiver with its own remote controller.

### Notes

- Each time the SAT.CONT. button is pressed, this function goes on or off.
- To make a position number appear in the VTR display after you have cancelled this function, press the INPUT SELECT button.

#### Changing satellite channels automatically in the timer programme recording

When timer recording programming, press the SAT.CONT. button to display SA on the screen, and then enter a desired satellite channel using number buttons (Step 5 on the "Timer Programming Procedure" Section). Go through steps 1) and 2) above beforehand and confirm that channels are properly selected.

Keep the satellite receiver turned on even while the VTR is in the timer programme recording.

| Brand name     | Brand code                                   |

- · For some brands, several brand codes are allocated.
- · Some satellite receivers may not be operated at all with this VTR.

## 16. RECORDING FROM A SATELLITE RECEIVER

If you are using a satellite receiver, you can connect it to this VTR to record a satellite programme.

## **Recording Procedure**

#### Preparation

- · Turn on the VTR.
- · Select the video channel or video input mode on
- · Make sure your satellite receiver is connected to the VTR correctly using a SCART cable, and

Load a cassette with the safety tab attached.

Press the TV/VIDEO button so that the "VIDEO" indicator appears in the VTR display.

2

Press the INPUT SELECT button so that "SA" indicator appears in the VTR display.

Each time you press the INPUT SELECT button, 2 the display changes as follows.

→ TV (position number) → L1 → L2 → SA (satellite)

Select the desired satellite channel on the connected satellite receiver.

Make sure that the selected channel is on the

Press the SP/LP button to select the recording tape speed.

Press the REC button on the VTR, or simultaneously press the two REC buttons on the remote controller. Recording starts.

11

Press the **STOP** button to stop recording.

23

# You can watch a satellite programme from your

connected satellite receiver even while the VTR is recording a TV programme, or is in the playback or stop mode.

#### Important

This function only applies when the TV and the satellite receiver are connected to the VTR using the SCART socket.

#### ■ Watching a satellite programme while recording a TV programme

1) While recording a TV programme, press the SAT.MONI. button.

10

The "MONI" indicator appears.

Each time you press the SAT.MONI. button, the indicator goes on or off.

2) Choose a desired satellite channel on the connected satellite receiver.

#### Watching a satellite programme while the VTR is in the playback or stop mode

- 1) Press the **SAT.MONI**. button so that the "MONI" 10 indicator appears in the VTR display.

1

- 2) Press the TV/VIDEO button so that the "VIDEO" indicator appears in the VTR display.
- 3) Choose a desired satellite channel on the connected satellite receiver.

- If you make the on-screen display (ex. MENU screen) appear on the TV, this function is cancelled.
- The satellite monitor function is also available in the timer programme recording mode.

#### ■ Watching a TV programme while recording a satellite programme

- 1) While recording a satellite programme, press the TV/VIDEO button so that the "VIDEO" indicator disappears in the VTR display.
- 2) Choose a desired TV channel on the TV.

## 17. VIDEO PLUS+ RECORDING OF SATELLITE PROGRAMMES

You have to set the guide channel to record a satellite channel by Video Plus+.

## **GUIDE Channel Setting for Satellite Channels (Using a Satellite Receiver)**

The VTR generally does this setting during "Setting to Control Satellite Channels" procedure. Use this procedure to correct the GUIDE channels or to make the GUIDE channel setting if your satellite receiver has a channel order other than SKY or ASTRA.

#### Preparation

Select the video channel or video input mode on the TV.

To set a GUIDE channel 101 of SKY ONE.

Press the OSP button to display the MENU

Press the SAT. CONT. button (SA displayed), 18 and enter a channel number on the satellite receiver using number buttons.

receiver channel selector . . .

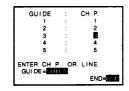

26

Press number button 5 to select "TUNING AND SATELLITE".

Press number button 3 to select "VIDEO PLUS+ GUIDE CH".

16

③

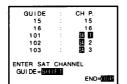

GUI DE = SILIF I

If SKY ONE is channel 8 on your satellite

Scroll the numbers to put 101 in the center position of the "GUIDE" column using the SHIFT button.

To set GUIDE channels for other satellite channels, repeat steps 4 and 5.

Press the **OSP** button three times to exit.

18

Refer to the chart you prepared

| Satellite stations          | GUIDE | Channel on yo<br>satellite receiv |    |
|-----------------------------|-------|-----------------------------------|----|
|                             |       | *A                                | *B |
| SKY ONE                     | 101   | 1                                 | 8  |
| SKY NEWS                    | 102   | 2                                 | 12 |
| SKY MOVIES                  | 103   | 3                                 | 16 |
| THE MOVIE CHANNEL           | 104   | 4                                 | 18 |
| SKY SPORT                   | 105   | 6                                 | 20 |
| NICKELODEON / NICK AT NIGHT | 106   | . 7                               | 46 |
| PARAMOUNT                   | 106   | 7                                 | 46 |
| EUROSPORT                   | 107   | 10                                |    |
| GALA VISION                 |       |                                   |    |

| 5   |    |
|-----|----|
|     |    |
| 5 5 | 26 |
| 17  | 37 |
|     |    |

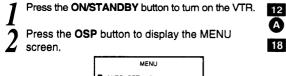

Now you can make Video Plus+ recordings of satellite channels.

## 18. MANUAL SET UP

The manual procedure of Auto Set Up will help an additional TV station storing or clock resetting, etc. This VTR can store up to 48 positions for TV stations.

# Reset-Up Automatically Use this procedure if the Auto Set Up needs to be made again, for example, after a power failure, when plugged off, or in the event of receiving stations change. Preparation

- Turn on the TV, and select the video input mode or video channel if you made the aerial connection.
- If your satellite receiver is connected using an RF lead, select SKY ONE on the satellite receiver.
   Auto set-up will allocate position number 6 on the VTR for the satellite output.

Press number button 1 to select "AUTO SET UP".

The VTR starts the automatic TV station storing and clock setting if you press the SHIFT (→) button.

Stations" for the TV station.

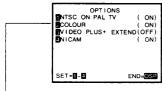

## normal TV screen.

#### Note

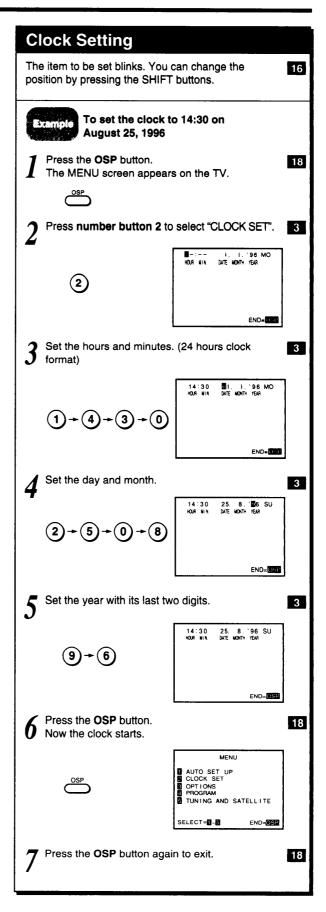

If the time of the clock is not correct after this procedure, perform "Clock Setting" on this page.

## Spike State of the Control States

If you press **number button 3** while the MENU screen is displayed, the screen turns to the OPTIONS screen.

Press **number button 2** to select "OFF", if the TV programme or the tape is monochrome.

3

## **Manual Storing of TV Stations**

#### Information

Each TV station operating in the U.K. (e.g. BBC1, ITV) broadcasts on a unique frequency, which in turn has been allocated a transmission channel number (21 - 69). However, this unique frequency and corresponding number changes for each TV station from area to area. For example, BBC1 in London uses channel number 26, while in Oxford BBC1 uses channel number 57 (i.e., CH57).

To receive broadcast programmes on this VTR, it is necessary to select the tuning range number correctly in your area. The TV channel numbers in the parentheses are indicated in the VTR display.

| Tuning<br>range<br>number | Band | TV channel number                            |
|---------------------------|------|--|
| 1                         | VHF  | A – J (1 – 10), 11, 13<br>E2 – E12 (82 – 92) |
|                           | UHF  | E21 - E69 (21 - 69)                          |
|                           | CATV | X, Y, Z (71, 72, 73)                         |
| 2                         | CATV | 1 – 53<br>(48MHz to 464MHz, 8MHz steps)      |
| 3                         | CATV | S1 - S41 (1 - 41)                            |

#### Preparation

- · Select the video channel or video input mode on the TV.
- · Turn on the VTR.
- If you use a satellite receiver, make the connection correctly and turn it on.

To store BBC1 to position number 1 on your VTR.

Allocation of the TV stations into the memory of the VTR is expected to be as follows, for Video Plus+ recording.

BBC1:

Position number 1

BBC2:

Position number 2

ITV:

Position number 3

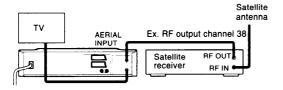

CHANNEL 4: Position number 4

CHANNEL 5: Position number 5 (From 1997) Satellite:

Position number 6, example (if

connected by an RF lead only as

shown below.)

In this case, select position number 6 in step 4, and channel 38 in step 5 if the output channel of your satellite receiver is 38, for example. Make sure that TV receives a satellite broadcast.

Whenever you watch or record a satellite programme, select position number 6.

#### Important

This procedure can be performed only when the VTR display shows a position number on the VTR. If the "L1", "L2" or "SA" is displayed, press the INPUT SELECT button so that the position number appears.

Press the OSP button to display the MENU

18

Press number button 5 to select "TUNING AND SATELLITE".

3

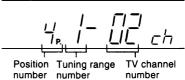

Press number button 2 to select "MANUAL TUNING".

VTR display

3

The VTR is now in the tuning mode, and the screen display disappears.

(2)

Press the CH/TRK button to select position number 1

15

12

Press number button 6 repeatedly to select tuning range number 1. (See the table on left.)

3

Press and hold the SHIFT button to start searching for BBC1.

16

Higher numbered channel

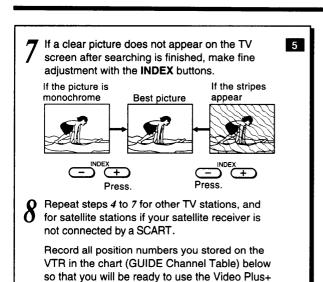

Lower numbered channel

If the received TV signal is not BBC1, press and hold the SHIFT button again.

(continued)

Press the OSP button.
Channel tuning is now finished.

recording.

Once station storing is done, you can select a TV programme by the position number on which the TV station is stored.

18

15

3

3

18

You can prevent the use of certain position numbers.

- Set the VTR to the tuning mode following steps I to 3 of the station storing procedure.
- Select the position number you want to skip with the CH/TRK button.

To skip position number 4.

3) Press number button 3.

The following indication will appear in the VTR display with the skip function on or off.

Skip function off

Skip function on

If you press **number button 3** again, the TV channel number will appear and the skip function will be cancelled.

4) Press the OSP button to exit.

To cancel channel skipping Follow steps 1) to 4) above.

#### **GUIDE Channel Table**

| TV stations         | GUIDE | Position number in which the TV station has been memorized on the VTR. |
|---------------------|-------|--|

## **GUIDE Channel Setting for TV Channels**

Video Plus+ is a timer recording system for an easier programming that requires you only to enter a PlusCode assigned to a desired programme. This section explains the necessary set-up to make Video Plus+ recordings.

#### Information

You can perform timer recording very easily using the Video Plus+ programming system of this VTR. Before making a Video Plus+ recording, it is necessary to set GUIDE channels in the VTR.

#### Important

There is no need to perform this procedure if the TV stations have been stored to the position numbers (1 for BBC1, 2 for BBC2, 3 for ITV, 4 for CHANNEL 4 and 5 for CHANNEL 5) on the VTR.

#### Preparation

Select the video channel or video input mode on the TV

Press the **OSP** button to display the MENU screen.

18

Press number button 5 to select "TUNING AND SATELLITE".

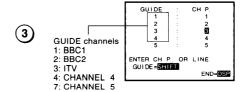

3

5

Press number button 3 to select "VIDEO PLUS+ GUIDE CH".

3

GUIDE channels 1 to 5 have been factory set to position numbers 1 to 5 respectively. Make sure that the numbers are matched as above.

#### Note

To set another TV channel, select the GUIDE channel using the SHIFT button, and in the "CH P." column enter the position number in which you have stored the TV station by number buttons.

16 3

Press the **OSP** button three times to exit. The GUIDE channel setting for TV channels is complete.

18

Now you can make a Video Plus+ recording of TV programmes.

If you use a satellite receiver, make the GUIDE channel setting for satellite channels as well.
